NOTE—Contn Sheet

CM 101-53-4

Letter o F 14-7/52-G F (S) dated 28th April 1953 from the Under Secretary to Government, inistry of Food and griculture (Agriculture) ew Delhi to the Sec et ry to Govefrment of y ore, Forest a Agriculture Dep rtment- B ngalore

Suo ect F Programme for 1953 - 54 - Fin cial Assist nce

I am directed to refer to the minutes of discussions held in this inistry on the 6th Tebruary, 1953 and also to your letter No. F 12813 dated the 24th arch 1953, on the subject noted above, and to say that the President is pleased to sanction (1) a grant not exceeding 5,58,832/- (rupees five lakhs, fiftyeight thousand eight hundred and thirty two only) and (ii) a loan of 67, 0,000/- (rupees sixtyseven lakhs and thirty thousand only) in connection with the cre e mentioned in the attached statement The basis on which the grant is sanctioned for individual schemes is also explained in the note enclosed herewith

2 The actual rel ase of the loan will, however, be based on authorisations to be issued by the Government of India on the basis of requests from the State Government that they require the loans and are ready to draw it It is accordingly requested that the exact amount of the loan required for immediate utilisation may please be intimated urgently so as to be enable this inistry to issue the necessary authorisation for payment The cre s of of the loan and t interest chargeable thereon will be intimated to the time the loan is authorised for payment

I am also to offer the following remarks in respect of the schemes mentioned below -

(1) Wells for irrigation purposes - In agreeing to the 4,875/- grant and 11 25 lakhs as loan the intention of the Government of India was to allow not more than an overall subsidy of 25% of the cost of the whole subject to a maximum of 250/- per well to be constructed in areas other than scarcity areas and a maximum subsidy of 500/- per well to be constructed in scarcity areas This is to be done by adjustments within the grant agreed to and not by making additional provision in respect of wells to be constructed in the scarcity areas The Government of India, therefore, regret their inability to sanction any further

grant in addition to ₹ 1 875 1 kh agreed to at the meeting This amount may be distributed between wells in the scarcity areas and other areas

(11) Preparation and distribution of urban co post - This scheme is sanctioned on the distinct understanding that from the year 1954-555 onwards, the expenditure on staff should be substantially reduced and that a part of the transport charges should also be recovered from the cultivators

4 The grant sanctioned above is debitable to the Demand No 41- Extra-Ordinary Payments - Grants to States for C I F Schemes

5 The loan sanctioned above is debitable to Demand No 122 - Loans and Advances by the Central Government - Advances to State Governments for C I F Purposes

6 It is requested that progress reports on the working of the schemes may please be sent to this Ministry regularly in the usual proforma

EXPLANATORY NOTE TO THE GRANTS SECTION D FOR INDIVIDUAL SCHEMES

= = = = = = = = = =

(a) Subsidy for construction of irrigation wells -

The scheme is sanctioned on the basis of 25% of the total expenditure on a well to be given as subsidy subject to a maximum subsidy of Rs 250/- per well in respect of wells to be constructed in scarcity areas where the cost of constructing a well is estimated at Rs 2,000/- The maximum subsidy of Rs 500/- per well may, however, be allowed

The cost of subsidy involved at 20% of the total cost is estimated to be Rs 3 75 000/- and the Government of India's share at 50% comes to Rs 1,87,500/-

(b) Multiplication and distribution of improved seeds -

The total cost of the schemes is detailed below -

i	Subsidy on 7,000 tons of seed at 2/- per maund	1,63,344
ii	Expenditure on staff	26,812
iii	Total cost	1,90,156

The Government of India's share of the cost at 50% thus comes to Rs 95,078/-

(c) Preparation and distribution of manure mixture -

The total cost of the scheme is as follows --

i)	Transport and incidental charges	2,00,000
ii)	Manure mixture charges	75,000
iii)	Cost of staff	27,555
	Total Rs	3,02,000

The Government of India's share at 50% therefore comes to Rs 1,51,278/-

(d) Preparation and distribution of Urban compost - -

The total cost is as follows -

i)	cost of the staff	Rs 50,000
ii)	Subsidy for clearing and transport charges	" 1,00,000
	Total Rs	1,50,000

The Government of India's share at 50% thus comes to Rs 75,475/-

(e) Plant protection schemes - It is proposed to purchase and stock insecticides and pesticides and make them available to needy cultivators The cost of the scheme is detailed below -

i	Cost of insecticides	"	20,000
ii)	Expenditure on Staff	"	21,000
iii)	Lum sum grant for other miscellaneous charges	"	9,000

iv) Recovery from cultivators (50% of the cost of insecticides) 10,000

v) Net cost 40,000

The Government of India's share of the net cost at 50%, therefore comes to Rs 20,000/-

(f) Establishment of Deputy Director of Agriculture for Plant Protection works

The cost of the establishment during 1953-54 as stated to be 39,002/- as detailed below

The cost of the establishment during 1953-54 is stated to be 39,002/- as detailedbelow

i)	pay of the staff (six Agricultural Inspectors, two first Division clerks, two second division clerks, one steno-typist, nine typists, three peons and two watchmen)	23,531- 8- 0
ii)	Allowances	" 6,700- 8- 0
iii)	Travelling allowances	" 2,684- 0- 0
iv)	Contingencies	" 6,000- 0- 0
	TOTAL	" 39,002- 0- 0

The Government of India's share at 50% thus comes to Rs 19,501/

Office of the Commissioner for Food Production,
in Mysore, Bangalore, dated the 5th May, 1953.

No.

T.,

The Secretary to Government of Mysore,
Local-Self Government,
B A N G A L O R E.

Sir,

Re:- Bangalore City and Mysore City Sewage Utilisation Schemes - 1953 - 1954.

I write to state that the Government of India have in their letter No F 14-7/52-G M F (S) dated the 28th April 1953,(Vide copy enclosed for ready reference) sanctioned a loan of Rs. six lakhs for the Bangalore City Sewage Utilisation Scheme and sum of Rs. Eighty thousand for the Mysore City Sewage Utilisation scheme for the year 1953 - 1954. These Schemes were formulated by the Corporation of Bangalore City and Mysore City Municipality and copies of the Proformas which were sent to the Government of India, are also enclosed. These Schemes were discussed in details in the meeting with Sri Datar Singh Additional Secretary to the Government of India, Ministry of Food & Agriculture, New Delhi, who was anxious to take up these schemes very early during the current year.

I request you kindly to obtain early sanction of Government to implement these two schemes and necessary sanction may kindly be obtained to issue the loan to these local bodies after drawing the same from the Government of India Necessary instructions may also be kindly issued to the Corporation of Bangalore and the Municipality Mysore regarding the terms and conditions relating to the repayment of the loan They have been requested by this Office to intimate the amounts required to be drawn immediately Necessary provision in the current year budget has also to be made for these two schemes.

Yours faithfully,

Sd/-

BANGALORE SEWAGE UTILISATION SCHEME

Part I

This scheme provides for utilising about 3 million gallons of sewage per day The sewage gets diluted with other leakage water during the Kharif and Rabi seasons and can be very profitably used for Kharif and Rabi crops The sewage effluents will be pumped and utilised in an area of about 1000 acres in the Kenchenahally Village

The capital cost of the scheme is Rs.6/- lakhs The recurring expenditure will be of the order of Rs.1 lakh while the annual revenue from the scheme on full development will also go up to Rs. one lakh

The scheme as stated above will benefit 1000 acres and will give an additional production of 1500 tons valued at Rs.4/- lakhs annually

PROCEEDINGS OF THE GOVERNMENT OF MYSORE

R e a d :-

Correspondence ending with letter No.C2.P.M.57/51-52 dated the 22nd May 1953 from the Municipal Commissioner, Mysore, stating that the purchase of a "Ferguson Tractor" for the Municipality is essential to implement the Compost of Sewage Development Scheme for which a loan of Rs.60,000/- is being granted during the current year to the Municipality by the Government of India and that the Municipality has resolved to purchase the "Tractor" out of municipal funds only and accordingly soliciting sanction of Government to the resolution of the Municipal Council to purchase the "Tractor".

Govt No.L. 4101-2 TEM 101-53-7

DATED, BANGALORE, THE 16th JULY 1953.

Sanction is accorded to the purchase of a "Ferguson Tractor" for the Municipality at a cost of about Rs.12,065/- (Rupees Twelve Thousand and sixty five).

2. The expenditure in this behalf may be met out of the provision made under "...11 - Sewage Farm - Tools and Plants" and by re-appropriation.

Sir,

Subject: Sewage Development Scheme

With reference to your letter No L 2403 CA. 101-53-5 dated 21-5-1953 on the above subject, I write to state, as detailed proposals were called for the scheme, the Municipal Engineer was requested to make a survey of the area to be brought under cultivation and also the spots where the septic tank and the sump well have to be put up etc Accordingly after taking levels etc , the Municipal Engineer prepared detailed estimates for the several items of work to be attended to in connection with the execution of the scheme The total estimate of the scheme works out to Rs 165,000/- as per the following abstract

		Rs
1	constructing an additional septic tank at the main outfalls in the municipal farm	57,000
2	constructing grit chambers attached to the septic tank	13,500
3	construction of "u" shaped inlet and outlet drain, sludge drains, manholes, underground s w pipe lines, inter connecting the several chambers of the septic tank	20,000
4	constructing a sump well for storing and lifting the effluent into a high level tank	~~61,000~~ 6,100
5	constructing high ~~school~~ level storage and distribution reservoir for irrigation purposes	17,000
6	installation of three 30 H P pumps with motors pipe line valves and specials	42,000
7	construction of a pump house rear sump well	3,200
8	electric connections	1,000
9	construction of staff quarters by converting the existing dry cattle shed	3,000
10	survey charges	300
11	temporary establishment	~~19,000~~ 1900
	Total	Rs 1,65,000

65,000
165

Detailed estimates for each of the items are enclosed for reference and needful

The scheme together with the note of the Municipal Commissioner (copy enclosed) was placed before the Managing Committee at their meeting held on 13-7-1953, and the same was duly approved and recommended to council The Council has also approved of the proposal and resolved to forward the same to Government for securing the required loan from the Government of India

It is to be stated that Dr Talathi when he first visited the farm on 14-8-1951, gave a suggestive scheme for Rs 1,56,750/- taking the entire cultivable area of the farm into consideration After a further detailed inspection of the Farm on 4-11-1952, the scheme was limited to Rs 80,000/- based on rough figures taking the cultivable area to be 100 acres in the eastern segment of the farm But as per the detailed estimates, the cost works out to Rs 1,65,000/- It is understood, as is mentioned in the note of the Commissioner placed before the Managing Committee and the Council, that the Municipal Engineer who had been sent to Bangalore to meet Sri Datar Singh, ~~that~~ Additional Secretary to Government of India on 2-5-1953, observed that if the grant made by the Government of India to the extent of Rs 80,000/- was found inadequate after working out the details, additional grant would be made available in the next year after consideration For this reason attempt has not been made to keep the estimate within the sum of Rs 80,000/- as indicated by Dr Talathi in November 1952 It is proposed to work out the scheme as mentioned in the note in two stages, viz, construction of the septic tank, grit chambers, with inlets etc , and purchase of the pumps aggregating to Rs 115,000/- in the first stage and to work out the rest of the items in the second stage The Council will be grateful if the Goverrment of India could be pleased to sanction the loan to this extent

The annual income from the area proposed to be brought under irrigation is expected to be not less than Rs 75,000/- at Rs 750/- per acre for 100 acres The annual recurring expenditure is expected to be not more than Rs 55,000/- as detailed below -

1	120 labourers at Rs 30/- p m for 12 months	Rs 43,200/-
2	six maistries at one for every 20 labourers at Rs 42/-	3,024
3	one inspector on Rs 55-5-100-10-150	1,308
4	up grading of the farm manager by raising the status to an Assistant Director of Agriculture	3,000
5	Pump operator (40-2½-50-3-80)	720
6	Electric charges, lubrication etc	5,000
	Total	Rs 54,952
	or	Rs 55,000

It is proposed to utilise the net savings of Rs 20,000/- supplemented by municipal funds to the extent required, if necessary, for the repayment of the loan in 8 annual instalments at a rate of interest of 3%, which the Council expect to be charged by Government of India, as a special case in view of the financial position of the municipality as also the special facilities which the Government of India are generously giving to local bodies for such works

I enclose herewith the copy of the resolution of the council to obtain a loan of Rs 1,65,000 by the Government of India at 3% interest and repayable in 8 annual instalments The detailed plans and estimates also are enclosed

I request that Government may be moved to sanction the above scheme and cause to obtain for the council the required loan

Yours faithfully,

(N Lakshman Rau)
Municipal Commissioner

Forwarded with compliments

(T Venkata Ramanaiah)
President

Copied 26/9/57

Proceedings of the Council by Circulation

386 Special Managing Committee Res No 211/13-7-53 recommending approval to the office note dated 9-7-53 re a scheme costing Rs 1,65,000/- as prepared by the Municipal Engineer for the utilization of the Sewage Effluent for irrigation purposes and as detailed below -

1) Constructing an additional R C C septic tank at the main outfall in the Municipal Farm	57,000
2) Constructing grit chambers attached to the Septic tank	13,500
3) Construction of 'U' shape & outlet draining, sullage drains, manholes, underground S W pipe lines inthe inter connecting the several chambers of the Septic tank	20,000
4) Constructing a sump well ... oring and lifting the effluent into High level tank	6,100 ~~61,000~~
5) Constructing High level storage and distribution reservoir for irrigation purposes	17,000
6) Installation of three 30 H P pumps with motors, pipe line valves and specials	42,000
7) Construction of pump house in sewage Farm near sump well	3,200 ~~23,00~~
8) Electrical connections	1,000
9) Construction of staff quarters by converting the existing (New) dry cattle shed	3,000
10) ~~Sundry~~ Survey charges	300
11) Temporary Establishment	1,900 ~~19,000~~
	1,65,000

The income thereof being estimated at Rs 75,000/- for 100 acres at Rs 750/- per acre and the recurring expenditure being Rs 55,000/- and the net savings of Rs 20,000/- after ~~after~~ supplementing if necessary with normal funds to make up the deficiency of the instalment, for the repayment of the loan of Rs 1,65,000 in 8 annual instalments of Rs 21,000 with interest at 3%

The subject having been circulated among the members of the Council, 26 members have approved of the proposals, the remaining 4 being absent while the files were taken

It is therefore resolved that the scheme recommended by the Managing Committee costing Rs 1,65,000 as detailed above, for the utilization of the sewage effluent in the Municipal Farm for irrigating an area of 100 acres by pumping the effluent to upper regions in the sewage Farm be recommended and forwarded to Government with a request to recommend for grant of loan by the Government of India, repayable in eight annual instalments ~~xxx~~ at interest not exceding 3%

Sd J Venkata Ramaiah
President

PSK

Municipal Commissioner

City Municipality,
Mysore, Dated 9th July, 1953

A Note on the Municipal Farm - Development Scheme

Introduction

The Sewage Farm or the Municipal Farm was handed over to the Municipality by the Trust Board for upkeep and maintenance in the year 1917 Since then, except for a brief period the Farm has been under the control of the Municipality During this period, the Farm area has ~~grown~~ been extended, as lands have been acquired and added on At present the extent is 365 acres But the capacity of the Septic Tank now in existence is hardly sufficient to treat all the sewage water received There is one septic tank with six units This was obviously designed for a population of about 55,000 or a little more The present population is nearly 2 5 lakhs and the sewage water of the whole city is in the region of 2 million gallons As a result only a small quantity is treated while the rest is allowed to flow untreated As a Therefore the whole area has become sewage sick Even the quantity treated does not undergo the complete process on account of the small capacity of the existing septic tank As mentioned by the Engineer, in this connection, Dr Talati who visited the Farm first on 14-8-1951 furnished a suggestive

scheme involving an expenditure of 1 56 lakhs for the utilisation of the sewage effluent for irrigation purposes Subsequently he visited on 4-11-1952 and gave a revised abstract scheme for Rs 80,000/-

2 The Municipal Engineer to whom the matter was referred for putting up detailed estimates, plans etc , has now submitted the same According to this, the estimate will be Rs 1,65,000/- (vide the abstract estimate enclosed) Provision has been made for construction of an additional septic tank, grit chambers, U shaped inlet and outlets drains, sludge drains, manholes, sump well for storing effluent, distribution reservoir, installation of three 30 H P Pumps with motors, construction of a Pump House, quarters etc In the report accompanying the estimate the Municipal Engineer also points out that during April 1953 when he met Sri Datar Singh, Additional Secretary, Ministry of Food and Agriculture, Government of India, Sri Datar Singh observed that if the grant of Rs 80,000/- for the scheme as proposed by Dr Talati was found inadequate after working out the details, additional grant required would be made available next year after consideration For this reason attempt has not been made to keep the estimate only within the 80,000/- indicated by Dr Talati

3 Out of the items mentioned in the abstract estimate this year the following works could be taken up and completed ~~xtx~~ viz ,

(1)	construction of an additional septic tank	Rs 57,000/-
(2)	construction of grit chambers attached to the septic tank	Rs 13,500/-
(3)	construction of 'U' shaped inlet and outlet drains with manholes	Rs 20,000/-
(4)	purchasing of pumps, with motors	Rs 25,000/-
	Total	Rs 1,15,000/-

This may be taken as the first stage We may request the Government of India to give us this much during this year instead of Rs 80,000/- In case the Government of India are not willing to spare anything over Rs 80,000/- then the balance will have to be met out of the closing balance of the Municipal funds

4 From more than one point of view it is - necessary that we should take advantage of the loan offered by the Government of India and improve the capacity of the existing septic tank and most of the raw sewage now is allowed to flow untreated into Dalvoy tank and other places There have been frequent complaints from the Director of Public Health and others that this tank which is by the side of a provincial road is allowed to be polluted like this,

and that it emits a very bad smell though it is a tank about which the City Municipality has got to take great care being more or less in the heart of the city Apart from this, increasing the capacity of the septic tanks and bringing more lands under cultivation is likely to give us a better revenue At present the distribution of land in the Municipal Farm under the various crops is as under

(1) Grass	63 acres
(2) Vegetables	4 acres
(3) Cocoanuts	60 "
(4) Cocoanut seedlings	12 "
(5) Mangoe and tamarind roots	12 "

There is an extent of 90 acres of pasture land, 80 acres of dry land (which is not cultivated) The compost yard occupies 14 acres and roads, buildings, septic tank, fence and drains 30 acres By increasing the capacity of these septic tanks not only 80 acres of dry land lying fallow but also another 20 acres out of the pasture land could be brought into cultivation The idea in brief is to increase the capacity of the septic tank and thus the quantity of the effluent to pump the effluent to the high level distribution tank and utilise the same by gravity for the cultivation of the 100 acres

5 Likely Income Realisation at the rate of Rs 750/- per acre for 100 acres would be Rs 75,000/-

For Commissioner for Food Production

Dr Talati has estimated the income at about Rs 500/- per acre but in some quarters it is said that it is possible to get as much as about Rs 1,000/- Therefore the figure has been kept for purposes of calculation at Rs 750/- The 100 acres block will be divided into three divisions, each plot to be brought under the crops by rotation The entire area will be croped not less than once a year The yield will be more if we can take a double crop But at this stage it is not proposed to make the calculations on this basis

6 Recurring Cost

1	120 labourers at the rate of Rs 30/- (12+12+ 120x30x12	43,200/-
2	Six maistries at one maistry per 20 labourers	3,024/-
3	One Inspector on Rs 55-5-100-10-150	1,36[illegible]
4	Up grading the status of the Farm Manager 150x12	3,000/-
5	Pump Operator (Rs 40-2½-50-3-80)	720/-
6	Electrical Charges, Lubrication of Pump etc	5,000/-
	Total	54 952/- or Rs 55,000/-

7 The net savings might be about Rs 20,000/- The loan may have to be repaid in eight annual instalments with interest (perhaps 3%) at the rate of Rs 20,625 or Rs 21,000/- Therefore more or less all the income during the first few years will have to be earmarked for repayment of the loan In the latest reference received from Government on the subject, it is stated that the terms of the repayment of the loan and rate of interest

For Commissioner for Food Production

will be intimated by Government of India at the time the loan is authorised for payment and that the Municipal Council should be prepared to abide by these terms

7 Though in the above paragraphs I have tried to point out that this is more or less a self-supporting scheme, in reality it has got to be considered as a scheme for the disposal of the sewage which is an obligatory duty of the Municipality It cannot be considered purely either as a revenue yielding proposition or a scheme which has got to be really self-supporting in the early stages But all attempts must be made to see that as little as possible is charged to the General Revenue of the Municipality

8 The Government may be moved to sanction the scheme and to address the Government of India to enable the Municipality to draw the loan sanctioned for the Mysore City Sewage Utilisation Scheme

9 The subject may be placed before the Managing Committee and the Council

Dated 3rd July 1953

REPORT TO ACCOMPANY THE ESTIMATES FOR Rs 1,65,000/- FOR THE CONSTRUCTION OF AN ADDITIONAL SEPTIC TANK IN SEWAGE FARM FOR THE UTILISATION OF THE EFFLUENT FOR IRRICATION PURPOSE

The existing septic tank constructed nearly 30 years ago has a capacity of 54,810 cubic feet(10½' x 15' x 6') probably designed for a population of about 55,000 and is now quite insufficient for the present conditions and population Major portion of the sewage received is passed off without any treatment into the fields with the result the area has become sewage sick and this is quite against the agricultural and health point of views

The present population of the city is nearly 2 5 lakhs spread over several mohallas including the new extensions and villages The sewage water of the whole city with the exception of new extensions of Edigha Jalapuri and N R Mohalla flows into this main outfall and the flow is expected to be a little more than 2 million gallons per day It is therefore essential to have an additional septic tank to treat the extra flow In this connection it is to be stated that Dr Talati who visited the farm first on 14-8-51 gave a suggestive scheme involving a cost of 1 lak hs for the utilisation of the sewage effluent for irrigation purpose and later when he visited the farm on 4-11-52 gave a revised suggestion involving an expenditure of R 80,000/- only providing 2 sets of pumps (Four pumps in all) driven by electricity at a cost of Rs 30,000/- ~~and for~~ construction of a septic tank at a cost of Rs 32,500/- for treating 1 million gallons, construction of sump and distribution tank at a cost of Rs 12,000/- A copy of the same is herein enclosed

It is now proposed to construct a septic tank, a plan of which is herein enclosed, to treat a further quantity of 1 million gallons with 8 hours detention and it will be similar to the one existing with slight modifications The walls of the tank are of R C C and is provided with grit chambers as against catch pit provided for the existing tank and the new tank

For Commissioner for Food Production

is proposed to be built towards south of the present tank as shown in the site plan The effluent from these tanks is proposed to be collected, after being partially utilised for purpose of irrigation by gravity, in a sump tank and pump it into a highlevel storage, distribution tank so that further area of nearly 100 acres at higher region towards east of the farm may also be brought under irrigation A sump tank of 25' x 25' x 10'(38000gallons) capacity is proposed with the installation of three 30H P effluent lift pumps housed in a pump house (25' x 16') near the sump tank to pump effluent into a high level reservoir and distribution tank of the capacity of 1,56,250 gallons This tank is proposed to be located at the high est point of irrigable area with a R L 225 35 The supply to the fields from this tank will be on gravity system

During the meeting of the officers at Bangalore during April 53 with the additional secretary of Food and Agriculture, Government of India, Sri Datar Singh, which was attended to by the undersigned, it was reported that the grant of Rs 80,000/- for the scheme as proposed by Dr Talati would be inadequate as the figure is not based on details and that the proposal would cost as per details now worked out more than 1 lakh of rupees for which the additional secretary was pleased to observe that the additional grant required will be made available next year after consideration.

All the items of work provided in the several estimates are necessary and the rates provided are based on current schedule and existing market rates Lumpsum provisions are made for items of wo the details of which will be worked out during execution

In order to take up the scheme immediately the estimate submitted for Rs 1,65,000/- may kindly be got sanctioned early.

D. Ramaiah
Municipal Engineer

copy of the Scheme proposed by Dr Talati on 4 7 51

MYSORE SEWAGE UTILISATION SCHEME

The water supply of Mysore City is about 5 5 million gallons per day. The city is partially sewered and there is a regular programme by the local body and the Improvement Trust to execute the sewerage system in unsewered portions of the city. There are some three outlets for the sewage. The main drainage of the city is towards the south and the Municipal Committee maintains a farm for disposing of sewage.

The sewage flow at this outlet is about 2 million gallons per day. The sewage is passed through septic tanks before being supplied for irrigation. The existing septic tanks are insufficient to treat the sewage flow and half the flow goes into the channel without this treatment. The sewage is medium in strength and the total nitrogen varies from 4 to 5 parts per 1,00 000 parts.

It is therefore essential to have an additional septic tank to accommodate the extra flow. The area under the disposal is about 365 acres out of which nearly 45 acres are covered by roads, buildings. The area under irrigation is 120 acres which includes perennial and seasonal irrigated area.

An area of 120 acres is required for grazing dry cattle. This therefore leaves a balance of 80 acres for irrigation in the existing farms. As stated above the present discharge is sufficient to irrigate an area of 400 acres and 120 acres are under irrigation and about 50 acres are irrigated by Sri Veeraraj Urs. It will, therefore, be necessary to acquire an area of 130 acres for complete utilisation of sewage flow. The proposed area lies on the Channashally village on the western side of the existing farm.

Area - The soils of the proposed area are sandy loam to loam and are well drained. They are producing only dry crops at present but under irrigation are capable of producing very good crops as under -

Sl No	Name of crop	Area in acres	Extra food production Mds	Product of extra value
1	Vegetables	210	21,000	Rs 1,05,000
2	- do -	210	25 200	1,26,000

It will be seen that an additional area of 210 acres will bring an extra produce of 46,200 mds of vegetables valued at Rs 2 31 lakhs.

Financial aspect

The capital cost of the scheme works out at Rs 1 6 lakhs, the annual expenditure including repayment of loan in 8 years and interest charges estimated at Rs 63,440/- The annual income is anticipated at Rs 1 05, The Scheme is therefore remunerative.

HS COPY

Copy of the Scheme proposed by Dr Talati on 4-11-52

City Municipal Office,
Mysore Dated 5th November 52

Note

In pursuance of letter No 12021 dated 25th October 1952 from the Secretary to Government L & G Department, Bangalore, addressed to the Municipal Commissioner, Mysore, a phone message was received on the 3rd November 1952 that Dr Talati, Compost and Sewage Development Officer, Ministry of Food and Agriculture, Government of India to South India, is going over to this City on the 4th November 1952 and that arrangements may be made for the examination of the Sewage Development Scheme in the Farm Accordingly the Officer paid a visit to the Municipal Farm at 4 P M on 4th November 1952 We traversed the entire area on the Eastern side of the Municipal Farm where dry land crops are now in existence He also enquired about the extent of land on this side of the farm that could be brought under irrigation if the Sewage water is pumped to this area He was informed that the entire segment of the Farm area towards the east of the main channel running in the middle of the farm would come to about 100 acres He was of the opinion that the scheme given by him previously in October 1951 might be adopted omitting the cost of acquisition of 130 acres (at Rs 500/- per acre) on the western side of the Municipal f rm, which he was told was not feasible as per Council resolution dated 8-4-1952 The scheme given by Dr Talati after omitting the above consists of the following -

1) Construction of a septic tank for treating 75 million to 1 Million gallon of flow at a cost of Rs 32,500/-	32,500/-
2) Pumping machinery for pumping sewage effluent comprising of 2 40 B P Electrically Driven Pumps and (2) 25 BHP Electrically D iven Pumps capable of lifting 52,000 gallons pump an hour at a head of 80 ft, the cost being Rs 30,000/-	30,000/-
	62,500

(*Continuation sheet draft form*)

The Ryigove City Municipal Council have agreed to take the loan and repay it in eight yearly instalments with interest. But the Municipal Council have prepared an estimate and Scheme as hereunder for a Sum of Rs 165,000/= and request Sanction thereto and to secure the additional Sum of Rs 85,000/= as loan from the Govt of India

(1) Constructing the additional Septic tank at the main outfall in the Municipal farm Rs 57,000

(2) Constructing quit-Chambers attached to the Septic tank Rs 13,500

(3) Construction of 'U' Shaped inlet and outlet drain, Sludge drains, manholes, underground S W Pipe lines

117- GPB—25 000—3 11 52

3) inter connecting the Several Chambers

(2) of the Septic tank ——— Rs 20,000/=

4) Constructing a Sump well to Rs 6,100/=
from which Storing and Lifting the effluent
is to into a high level tank.

(5) Constructing high level Storage Rs 17 000/=
tank and distribution reservoir for
from irrigation Purposes

(6) Installation of three 30 H P Pumps Rs 42 000/=
of with motors Pipeline Valves and
for Specials

7) Construction of a Pump house near Rs 3,200/=
to Sump well

8) Electric Connection Rs 1,000/=

9) Construction of Staff quarters by Rs 3,000/=
converting the existing dry cattle
shed

10) Survey Charges Rs 300/=

11) Temporary Establishment Rs 1,900/=

The Municipal Council proposes
to work out the Scheme in two
Stages Viz Construction of the
Septic tank, grit-chambers with
inlets etc. and purchase of Pumps

CITY MUNICIPAL COUNCIL
P B N 1/

Mysore Dated 11-8-53

FROM

THE MUNICIPAL COMMISSIONER
City Municipal Council
MYSORE

To

The Secretary to Government,
L S G & Planning Departments,
Bangalore -1
(Through the President)

Sir,

Subject - Sewage Utilization scheme

Adverting to letter No F C 2885-90 dated 8-8-53 addressed to you by the Commissioner for Food Production in Mysore, Bangalore, I write to invite your reference to my D O letter No C2 P R 54/52-53 dated 7-8-53 (copied to Commissioner of Food Production also) regarding the decision arrived at the meeting in the Chambers of the Home Minister on 5-8-53 when it was stated that Rs 80,000/- would be made available this year and the balance of Rs 85,000/- would be sanctioned during 53-54

I may however invite your reference to para 3 of my note dated 9-7-53 that had been placed by ~~kk~~ me before the Managing Committee and the Council according to which it is programmed to carry out 4 works at an estimated cost of 1,15,000/- during the year - 1953-54 But considering the time that might be available at our disposal after receipt of the grant, the first three items of work aggregating to an estimated cost of Rs 90,500/- will be taken up and the outlay in this behalf will be limited to Rs 80,000/-

I request you therefore kindly to obtain orders of - Government early to secure the loan to the extent of Rs 80,000/- this year so as to enable me to take needful action in the matter

P T O

the balance of ₹5000/- may be made available next year ie 1953-54

Yours faithfully,

Municipal Commissioner

11/8

Forwarded with compliments,

T. Venkataramaniah
